

Cloud Computing Competence Centre

2nd Annual Workshop

December 3, 2020

The C4 started operating in December 2018 and has been growing ever since. Currently the centre counts as collaborators around 20 grantees and around 50 faculty members from UBI, IPCB and IPG. The gathered scientific expertise is broad in scope and organised in 4 main research lines addressing different aspects of Cloud Computing. The focus of C4 is on research & innovation activities that may bring together academic and non academic parties, from industry to public administration, with the goal of providing solutions and support technology transfer in the wide realm of cloud computing.
